

Jintanquor KMA

Universal type soft fatliquor

- ▷ Jintanquor KMA is a main fatliquor for universal application that is developed especially for soft leather with low odor requirement, e.g. garment, glove, furniture, handbag and shoe nappa leather.
- ▷ Jintanquor KMA imparts a soft, smooth and round handle to the leather.
- ▷ In addition to be used as a main fatliquor for soft leather, Jintanquor KMA can be mixed with other anionic natural and synthetic fatliuor for other types of leathers, e.g. corrected grain and suede split leather.
- ▷ Jintanquor KMA has good light fastness and heat resistance.
- ▷ Jintanquor KMA is resistant to acid, hard water and electrolytes in leather processing.

PROPERTIES:

Appearance	Light Brown Paste
Chemical nature	Sulphited ester derivatives
pH (10%)	7.0±1
Ionic charge	Anionic
Solids content (%)	55%±2

APPLICATION:

1. Jintanquor KMA is to be diluted by stirring water of 60°C into the product at a ratio 1:5~10.
